What People Are Saying...

This is a COST CONTAINMENT and EXPENSE AVOIDANCE product...I have saved over \$500 per month and more just by using the product...it saves me money and time!

President, Venture Quest Marketing Group, Inc.

I was paying \$1,300.00 a month to have my business phone calls answered and then transfer to either sales or customer service...with this product I pay 120.00 a month and I have unlimited long distance...with this product I am saving \$1,180.00 a month and the service is excellent...I highly recommend the product to friends and family.

Sales, Colonial Health Care

I am self employed and this product has been a wonderful tool for me...when potential clients call me, it is not a voicemail message they get, it is my virtual assistant, which adds professionalism to my business.... I have lost my cell phone before and all of my contacts...now not only do I not have to worry about losing my numbers, I don't have to remember or write anyone's numbers down...I can't describe how wonderful it is to say "Call Jane at Work" and not worry about memorizing or program ming a phone number...it is a wonderful tool!

Engineering Consultant, Controls Consulting Inc

Using the product for 2 years and can not fathom being without...my primary communication tool, which has made my time more productive...live call screening, receiving/sending email and voice mail from my car...this product is so superior to other products, no one comes close to what it offers...I believe this product and company could be as influential in business as Microsoft!

Sales and Marketing, DarBree Enterprises

The product has enhanced my communications ability...one number follows me anywhere I am...I never worry about losing battery, I simply change my number to ring to another phone... I do not need to remember numbers anymore; my address book is available to me from any phone...totally awesome!!!

Private Vendor - Telecommunications

Recently I experienced a powerful paradigm shift in my business world with this product ...I pride myself in providing outstanding customer service to all of my clients, such that I answer all of my emails when I return back to my home office...many times my day would include seeing 2-3 clients, returning home at 6 pm, and then begin to respond to 75 to 100 emails that had accumulated that day...I have spent many late night hours responding to my clients...now, with this product, I can take care of my customers by being accessible all the time...the best part of all, I can respond to my customer's emails as they arrive in my Inbox...most of them are amazed and now want the product, too!
